

Blown Fibre Tube Intercept Cutter

The cutter performs both a circumferential and longitudinal sheath cut to expose the multi-tubes within a 6 x 4.5mm 7 blown fibre tube bundle. One or more tubes can be cut and connectorised to other tube(s) for diverse routing. The rear actuator locking mechanism ensures the tool remains closed during use.

An insert is supplied to enable 5 x 3.5mm 7 blown fibre tube bundle to be accessed in the same way. Other inserts for other blown fibre tube bundle diameters are available on request

Part No.	Description	Overall Dimensions (w x h x d)
OPT-T0133	7BFT 6 x 4.5mm (22mm) Intercept Cutter	90 x 65 x 36mm
OPT-T0164	Insert - 7BFT 5 x 3.5mm (18mm)
