Technical Helpline 0800 313 4036

The Blown Fibre Intelligent Airstone is located at the far end of blown fibre route and aids the installer with:

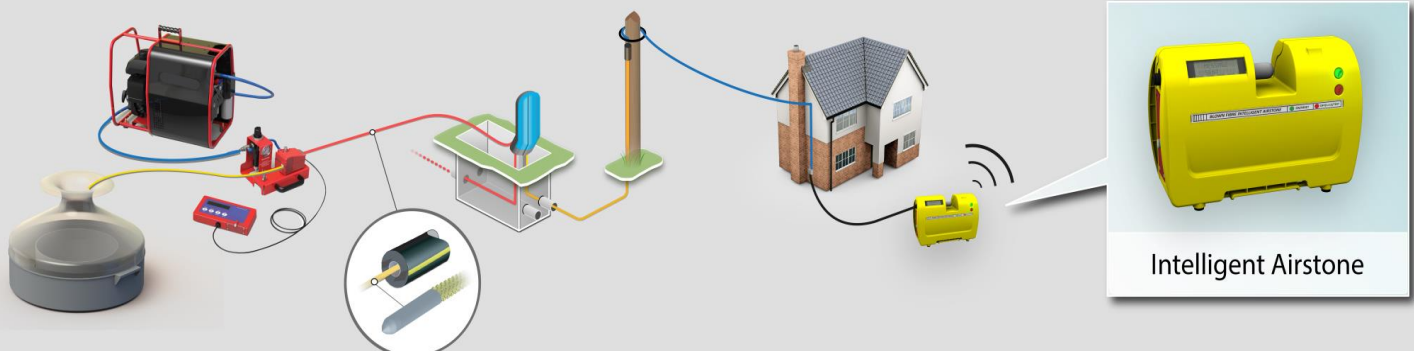

- **Confirmation that the correct blown fibre tube has been connected by detecting the compressed air at the far end**
- **Confirmation that the blown fibre unit has arrived at the far end**

The Intelligent Airstone is mobile phone in a 'box' with support electronics and software to detect the compressed air and the metallic blown fibre bead attached to the front of the fibre unit.

Features

- Easy to register mobile
- Input – 6mm Tube
- 6mm to 5mm Tube Reducer
- Re-chargeable battery
- Mains Charging Cable
